

EuroSys 2023 Conference

May 09–12, 2023, Rome, Italy.

<https://2023.eurosys.org>

EuroSys is a premier forum on various aspects of systems software research and development, including its ramifications to hardware and applications. Topics of interest of the conference include: operating systems, database systems, real-time systems, networked systems, storage systems, middleware, and distributed, parallel, and embedded computing systems. Traditionally, EuroSys brings together the topmost experts from academia and the industry, creating an environment where these two realities can interact, and discuss interesting and compelling issues in systems research.

EuroSys 2023 is a four-day event. The first day is devoted to workshops and tutorials, and the other three days are devoted to the main conference track. The main conference track is usually attended by 250-300 participants; it is a highly selective and competitive venue (the acceptance rate is usually less than 20%) that attracts scientists and experts from the entire world.

The event will be located in Rome's city center and hosted by the Sapienza University of Rome, the largest university in Europe (117,000 students and 3,300 faculties) and among the oldest in the world (established in 1303); more information can be found at: <https://2023.eurosys.org>.

In the past years EuroSys has been routinely sponsored by top companies such as: Amazon, Apple, ARM, Cisco, Facebook, Google, Hewlett Packard, Huawei, IBM, Intel, Microsoft, Oracle, Red Hat, Stormshield, Uber, and VMware. Sponsoring the EuroSys conference allows our community to grow, exposes your brand to highly-qualified attendees, funds our student grants, and keeps the EuroSys conferences affordable. Sponsorships allow us to provide economic support for students by funding their registrations, travels, lodging, etc. All past editions of Eurosys have had high student participation. Sponsorships are also used to pay for social events where most of the networking takes place and where new opportunities for collaboration between industry and academia may arise. Finally, sponsorships help us continue providing affordable registration fees for the community, in particular for students and young researchers.

In case you are interested in sponsoring EuroSys 2023, we offer several sponsorship packages. We are open to discussing custom packages that could better fit your needs. Please contact our sponsor chairs at: sponsorship-2023@eurosys.org.
